

## Freedom to choose

Net Neutrality is another word for freedom. Freedom from the power of a few to monopolize thought, access to information, and to censor content. The internet is not broken and does not need to be fixed -- although the entities promoting regulation are shameless in their attempt to manipulate the system in order to fill their coffers with more silver. The regulation of the internet in this fashion will serve to stifle creativity, entrepreneurship, economic growth, as well as adding a hidden tax on all Americans.

Please understand what the public is saying on this. Do not allow a few mega-companies to thwart the public good.
