

Many Voices = Vast Opportunity

Net Neutrality is essential to free speech, equal opportunity and economic innovation in America.

How many millions of entrepreneurs in America have had a chance to get products and ideas out there that have a significant impact on the entire American society?? We live in critical and uncertain times economically and closing any doors to the American entrepreneurial spirit at this time is a serious mistake.

Since the FCC removed this basic protection in 2005, the top executives of phone and cable companies have stated their intention to become the Internet's gatekeepers and to discriminate against Web sites that don't pay their added tolls. These companies rack in the dollars and provide lousy service. Why give them more power when they manage the power they have now so poorly?

This fundamental change ends the open Internet as we know it damaging citizen ability to connect with others, share information and participate in this 21st century democracy and economy.

The FCC must ensure that broadband providers do not block, interfere with or discriminate against any lawful Internet traffic based on its ownership, source or destination. Furthermore, broadband providers needs less power not more.

thank you so much for doing what is right for the American people.
