

Do we pay you to fuck us?

Hey, I am wondering why Internet Neutrality is even an issue right now.

"The FCC was established by the Communications Act of 1934 and is charged with regulating interstate and international communications by radio, television, wire, satellite and cable."

They didn't cover the Internet in 1934 did they? Does that mean it's open season on the most widespread bastion of Freedom of Speech mankind has ever seen?

I have one simple question for you - is it the FCC's job to regulate interstate communications or secure phone/cable monopolies - or is that one in the same to you?

If you hand these assholes anything more than they've already got, you are securing your place in the Hearts and Minds of the American People as one more corrupt, self-serving political branch - perpetuated only by Greed and a dark Hunger fed by Evil.

I know our freedom is doomed - I know because this would not be a question if we had honest people in your position of power; people who watched out for the well-being of their fellow man. But this is not the type of person I am writing to. I am writing to one of you five hungry dogs who knows nothing more than short-term gain and the benefits of Money. Whoever is being paid off - I salute you for the true degree of scum that you are. You doubly insult freedom of speech - as words do not even give valid description to the swine you and your organization are for attempting to restrict the voices of reason and individuality.

I assure you, if you give the phone companies Anything they are asking for: I will lead the crusade against the FCC; fuck the phone companies, we citizens will cut off the head and the body will die.

That is a guaranteed promise; not of anarchism or hostility, but bred of the defense of everything that is beautiful and true of the American Dream which you yourselves have helped to seed in our sheepish heads.

I will not watch the rise of some deranged Proto-Fascism brought about by a government agency that should have died and gone defunct in the '60s.

You do what you have to do, and so will We.
