

## Small Family Business

We are a small family company and the internet has helped us grow and compete world wide. We make hardware, barn accessories and plans here in Connecticut. Without the business we get from our website on the internet we would not be able to exist. We use local companies to help us create our products and they rely on our business to help them grow and be successful too.

Please keep the playing field level for us. We would have to close our company without the internet. It really is everything to us and our community of businesses.

Thank you,

Penny Barrows

Partner, Better Barns Hardware & Plans, LLC
