

An open internet helps keeps America healthy!

I'm a paramedic and I help people of ALL income levels. I've seen the internet help everyone. A lot of people now look up health information online before calling 911. People are able to get tons of information, and helpful advice for all kinds of ailments. Please make sure you keep the internet open to EVERYONE. That's what makes a Democracy great is EQUAL access to information.

Furthermore, with more and more political information available online it is imperative that we all have equal access to it and the more privileged don't get to pay a little extra to have faster/easier/better access to our government!
