

HAS ANYBODY IN FCC HEARD OF FREEDOM OF INFORMATION

Net Neutrality is WITHOUT A DOUBT an idea from the oval office who is terrified of the plain and unbiased truth that is available to all of us. Those who are temporarily in charge of censoring all forms of truth so that they can shove their propaganda down our throats do not like our freedom of internet expression and are running scared. DON'T LET THEM DO THIS TO US! God only knows how many more of our freedoms will be taken away and how many more of them will be able to commit TREASON (Libby) and get away with it. Don't YOU want to know what is really going on in your own country? I do! I do not want watered down biased fluff that is spoon fed by the media, I want to know the absolute, full guns, nondiluted truth and YOU in the FCC have no right to make decisions for me! Free speech will be taken away from you too! You are all being lulled to sleep by this administration and the few of us who are wide awake are screaming at you to wake up and smell the deception! RING, RING, RINGGGG! That is your alarm clock guys and you need to wake up!
