

Small Business Entrepreneur Helps Family&Neighbors

I am a small business owner and husband and father.I need an open and free internet because i of course use it for selling and buying online but more importantly for research for my children and also the neighbors children who dont have a computer or the internet.You know what they say,its the "information superhighway",and i would hate to see this go away or at least cost so much that the little guy"read that poor"would miss out.!! plead with you now to please let us keep our beloved internet free and open always!

Thank you.
