

DONT LET PRIVATE BUSINESS CONTROL THE INTERNET!!

THE INTERNET NEEDS TO REMAIN FREE!!!! The internet is an outlet of free speech. It is a breath of fresh air from the Television and Newspapers. Unlike other media it is not corrupted by big business or political parties. Anyone and everyone has a say on the internet, it is the essence of public voice. You dont have to pay or convince a editor or a television company to get opinion heard. China filters and censors information from its citizens, and it is thought as an abomination by democracies around the world. But is handing the internet over to private industry any better? So that companies can make people pay to see information. It is censorship!
