

You know the root of a strong republic is in widespread open discussion and education. By turning OUR airwaves over to a few shortsighted and greedy (how much money does Ed Whitacre need?) CEOs, you are turning your back on the Constitution and on the populace and YOU KNOW IT.

Air waves are just another layer one technology, just another transport like copper or fiber. You can make all the artificial rulings you want to open or close one or another, but they are all RAILROADS and need COMMON CARRIERS. WE HAVE BEEN THROUGH THIS BEFORE AND YOU KNOW IT. You know why we had common carrier rules and how useful they became.

In an information economy, open transit is the open railroad of the industrial era. By handing it over to greedy, sneaky, closed monopolists, you are handing MY CHILDREN'S future down the pike and America's Greatness will just continue to decline, with your help. We can be another Soviet Union, or a free and open society. YOU DECIDE.
