

Net Neutrality is important to me.

Please take note of my concern for the loss of Net Neutrality. It is essential that phone and cable companies not be afforded the opportunity to be the Internet's gatekeepers. Their discrimination against Web sites that don't pay their tolls is inevitable.

I am very troubled to have learned that the FCC removed this basic protection in 2005. I believe it is imperative the FCC ensure that broadband providers do not block, interfere with or discriminate against any lawful Internet traffic based on its ownership, source or destination.
