

kill Net Neutrality and you kill innovation!

I represent a small non-profit organization. Our website is our one source of outlet to let our constituents, funders and other stakeholders know what we are doing.

The tiered internet structure will severely affect our ability to maintain the usefulness of our website as we obviously are in no position to pay in order to be in the top tier.

Please keep the net neutral, hundreds and thousands of small organizations like ours depend on it to send our message across!
