Dear Commissioner Adelstein:

My family and I urge the Federal Communication Commission to reject the merger between XM Satellite Radio and Sirius Satellite Radio unless decency restrictions are applied to the merged satellite company.

The FCC does not require Satellite radio to comply with the decency restrictions that are enforced on terrestrial radio. Approving one satellite radio company with no decency restrictions will cause greater competition disparities between a satellite radio monopoly and terrestrial radio stations.

The FCC should apply indecency restrictions to satellite radio as part of the merger terms between XM and Sirius if the application is to be approved. Otherwise, we urge you to reject the merger because it will create competitive disparities that are unfair to terrestrial radio.

Sincerely,

Evelyn Johnson

Chairman Martin, I just reviewed the docket from May 29 in regards to the Sirius/XM merger and would like to comment. I really didn't understand all of it, but from what I could understand, it seems that the Commission is seeking comments in support or against the merger? Well I'm just a guy whose office is in my truck and I own 2 Sirius radio's I love it. But I also love Baseball and in order to listen to that I have to buy XM, or as I currently do now... subscribe to MLB.com, which I can only listen to on my computer at home. So yeah I support the merger. Also wont people who own stock loose a lot of money? From what I hear if the merger doesn't happen one of the two companies' will go bankrupt. Please be my hero and help this happen .

Dear Sir:

I am just an individual subscriber to XM. I've longed for a service that provides information and news on my long commutes, and local radio in Oklahoma is very limited. I feel connected to the world with satellite radio. My concern if they aren't allowed to merge, is that they won't be able to make it separately. Together they can compete with other formats, and if they attempt to overprice, people just won't pay for it. Please allow this service to remain available by allowing the merger.

I will disclose that I do own a small amount of shares in both Sirius and XM. But beyond that I do very much think that a merger of these two companies would be very beneficial to consumers in general and offer more channel choices and bring quality radio programming to many that can not get it now.

I should think that the best way to determine this would be to do a mailing to the current subscribers of the two services and ask these users of the services- after all it is these people that would or would not be harmed by a merger-whether they favor a merger even if prices were raised somewhat- but from what I have read prices are planned to remain where they are at.

I have subscribed to XM since about Nov. of 2003 and have been totally pleased with the service, especially on long trips where before regular radio service was poor or non existent.

I do not own an Ipod nor do I own many cd's but I believe that consumers will still have many other choices if the merger goes through such as the Ipod's ,cd's, regular radio, cell phones- which I am sure will get into the broadcasting of music eventually and if regular radio stations are harmed by this merger then it is up to them to build a better product and compete in the American way. And if they suffer then perhaps it is because we choose to have a different source then what regular radio provides.

Thank you

CIMS00000451310 - xm / sirius merger

tim@lancasales.com wrote on 6/28/2007 12:44:01 PM :

This should be allowed, there are so many other options available and competes with regular (and terrible) "free radio". There are too many free mediums for music and entertainment that these two should operate as one.

Movieman1977@aol.com wrote on 6/27/2007 9:31:42 PM :

Dear Sirs-

I read today you were looking for public opinion on whether the rules should be changed to allow Sirius/Xm to possibly merge into one company.

My opinion is YES, they should be changed. That law was put into affect in 1997...ten years ago now...and things have changed. Both companies as two separate entities make no sense right now...and they should be allowed to merge into one. Maybe one day there will be other companies to compete with them but for now...there is a huge "fan base" for satellite radio, and we want to see them do well. I live in Los Angeles and frankly, radio stations here are not good. We NEED Sirius out here to survive the amount of time we spend sitting in traffic alone!!!!

Give Sirius a chance. Give the merger a chance. Time have changed and that law should change too.

Thank you for your time,

Aaron Kuhl
