Marlene H. Dortch, Secretary  
Federal Communications Commission  
Office of the Secretary  
445 12th Street SW  
Washington, DC 20554

Dear Mrs. Secretary:

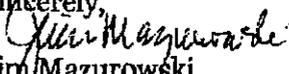

GraphicMark provides creative design, and printing services that help companies increase the identity of their products, enhance their image and attract their targeted audience. Our company is based in Chicago area and has been able to increase our clientele into several states.

Our company relies upon web-based communication to conduct our daily business. Broadband internet service has allowed our company to meet the needs of customer by facilitating quick turnaround and prompt responses on products and services. We consistently send large files that require a network and system that can handle the files in an efficient and timely manner.

Free universal broadband would ensure that all of our customers have the technological ability to handle large graphic files. Free broadband would also allow my business to take advantage of expanded online marketing opportunities and grow our customer base. An additional benefit of free broadband would be to free up limited financial resources to use in other area of our business.

There is a proposal before the Federal Communications Commission that would deliver fast, free and family-friendly broadband services across America. Under this plan, proposed by M2Z Networks, a nationwide broadband service would be available without any fee. As an independent business this would be a benefit to my company, my customers and the entire business community of which I am involved. I urge the FCC to promptly approve this request.

Sincerely,

  
Jim Mazurowski  
President / GraphicMark, Inc.
