RE: Docket Number 07-16

Mrs. Secretary:

We are owners of a mortgage broker company in the Chicago area. Since we deal a great deal with mortgages, access to the internet is of vital importance to our business to track markets and keep customers constantly informed on the products and services that best for their needs.

Small businesses operate on a tight budget. Increased costs in one facet of the business could impact other parts of the business. Web based marketing is infinitely cheaper than conventional advertising.

I recently read that at least 114 million adults in the United States are either completely unconnected to the Internet or rely on dialup connections. For small businesses like ours this is a vast marketplace just waiting to be opened up.

For these reason, we would like you to consider docket number 07-16 put before you by M2Z Networks. Their proposal to offer a nationwide wireless broadband network at no charge is an idea worth considering.

Free broadband would allow our company to expand our customer base, better communicate and serve the needs of my customers and market to thousands more individuals at a much lower cost. Also free broadband would eliminate a cost that would allow my company to use those scarce resources in other areas.

We urge your commission not to sit on this decision. Docket number 07-16 is a step in the right direction-for small business and the rest of the U.S.

Sincerely,

Robert Valente CEO
Raymond Gliwa President
