Dear Sirs,

I most heartily disagree with Chairman Martin's opinion on "Open Access." Chairman Martin is wrong, you need to tell him that his idea of "open access" is an anti-free market sham designed to benefit only a few spectrum bidders. This is absolutely CENSORSHIP of the worst kind. Government controlled censorship!

I support free market principles and equality for all, not just something the GOVERNMENT! Decides is right for all!

PLEASE Commissioners, DO NOT support Chairman Martin's efforts.

Sincerely,

Jan Slama

Dear Federal Communications Commission,

The iPhone has set the stage for the future of mobile Internet -- but bad policies allow companies like AT&T and Verizon to shackle great gadgets to their closed networks.

To free wireless Internet, the FCC and Congress must use the 700MHz spectrum auction to create an open network that gives consumers:

1. The freedom to use whatever device we want on any network.
2. The freedom to choose among many providers in a competitive wholesale marketplace.
3. The freedom to access any content or services we want through our devices.

Sincerely,

Thomas Greeley
