Robert McDowell
Commissioner, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Robert McDowell:

The Internet has become an integral part of American life and will only become more important in the future. That is why all Americans need access to Internet service that is fast, free and family-friendly.

Today there are at least 114 million adults in the United States that have limited or no access to the Internet. This highlights a clear gap between the communications infrastructure of the United States and many of our global competitors that already offer much faster and more affordable access. There is also a growing digital divide separating Americans who can afford to have access to broadband Internet connections and those who do not.

Increasing access to wireless broadband technology would serve many ends: it would foster an equality of opportunity through an equality of access, it would increase involvement in civic discourse by making news and governmental services more readily available, and it would undeniably drive the American economy to grow as small businesses currently without access join the growing world of global e-commerce.

Implementation of a fast, free, and family-friendly universal broadband access program, such as the one proposed by M2Z Networks (www.m2znetworks.com) and which is supported by the Coalition for Free Broadband Now, would be a welcome, and necessary, first step towards protecting our children online while ensuring that all Americans have affordable access to Internet service.

The time has come to take action! The FCC and the Federal government must work diligently to ensure that all Americans have access to fast, free, family-friendly broadband Internet connections.

Sincerely,

Mark Dorfman

Deborah Taylor Tate
Commissioner, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Deborah Taylor Tate:

America's broadband Internet goals are going unmet and America's international position is rapidly falling. Many American families, schools and libraries cannot afford broadband and most of rural America cannot even get access to the broadband Internet.

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way. I urge you to support the M2Z Networks (www.m2znetworks.com) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It will make us safer. We will become more competitive. It will create equal opportunity. It will improve our great country.

Please support M2Z today.

Sincerely,

somchay moukdarath
