

Do not block or restrict, just like my free speech

Net Neutrality is essential to free speech, equal opportunity and economic innovation in America. Since the FCC removed this basic protection in 2005, the top executives of phone and cable companies have stated their intention to become the Internet's gatekeepers and to discriminate against Web sites that don't pay their added tolls.

This fundamental change would end the open Internet as we know it. It would damage my ability to connect with others, share information and participate in our 21st century democracy and economy. The FCC must ensure that broadband providers do not block, interfere with or discriminate against any lawful Internet traffic based on its ownership, source or destination.

If the FCC is/are able to do this who knows what will be next? Want to access email? That will be another charge. Want to access port 23? Sorry, that is not covered under your plan. I can see where this horrible plan is going and its not going to be pretty. Especially when we possibly have to pay more because we are telecommuters that transfer large amounts of data to and from private networks. In Alaska we already have "Bandwidth Caps" that we have to pay more for because of where we live. Please do not allow this do go through. The effects of this will be catastrophic and I think will take the "Net" as we know it a few steps back as it will be too expensive for some people to afford and way more hassle than its really worth.

Sincerely,  
An IT Professional
