

## Support Seniors Free Communication Needs

Net Neutrality is essential to free speech, equal opportunity and economic innovation in America. Since the FCC removed this basic protection in 2005, the top executives of phone and cable companies have stated their intention to become the Internet's gatekeepers and to discriminate against Web sites that don't pay their added tolls.

This fundamental change would end the open Internet as we know it. It would damage my ability to connect with others, share information and participate in our 21st century democracy and economy. The FCC must ensure that broadband providers do not block, interfere with or discriminate against any lawful Internet traffic based on its ownership, source or destination.

Please act immediately to save the Internet.

\*\*\*I'm pushing 80years and would not be able to afford to communicate with family and friends should the present system change. This would also effect students the world over. Therefore I firmly believe the internet should be FREE TO ALL PEOPLE - AT ALL TIMES - ALL OVER THE PLANET --  
--We all share the sun

We all share the air

We must now be able to share the energy stemming from all of these FREE resources, resulting in FREE communication. Then perhaps in time the entire world as we know it will be Free to communicate good intentions at will. I don't know any of you that could object to that way of thinking.

Sincerely,

Jeanne Arneberg

601 N. Spaulding Avenue

Los Angeles, CA.90036

PS. Because of the Broadband rates as a senior they continually raised my rates until I was paying \$94.00 per month out of my \$688.00 social security, so I had to cancel. Only God knows what will happen to the rest of us if this plum is handed over to either Broadband or the telephone company. Please GIVE US A BREAK.
