Third Periodic Review of the ) MB Docket No. 07-91  
Commission's Rules and Policies )  
Affecting the Conversion )  
to Digital Television )  
 )  
To: The Commission

**Statement Regarding Post-Transition Operation**

Station WINK-DT, Channel 9, Fort Myers, Florida, has constructed the facilities specified in its digital construction permit, BMPCDT-20060524AEZ, and is prepared to operate post-transition with the facilities specified in its digital license, BLCDT-20060531ADP. These facilities vary slightly from those underlying in the new DTV Table of Allotments in that the antenna height above average terrain is 445 meters instead of 451 meters. This reduction in antenna height was necessary to maintain the Class C height and status of WINK-FM, which is top-mounted on the WINK-TV tower. All other operating parameters of WINK-DT are as stated in Appendix B of Seventh Report and Order and Eighth Further Notice of Proposed Rule Making, MM Docket No. 87-268, FCC 07-138, released August 6, 2007.

Respectfully submitted,

Joseph A. Belisle  
Counsel for Fort Myers Broadcasting Company
