

Stop the greed!!!!

We are already up to our necks in greedy corrupt politicians and corporations. Please, make them leave our internet alone NO more tiering no more filtering, no more please. We all deserve to speak and share with each other freely, this is what will change the world, do not tamper with the our future destinies as a free world i.e., sharing on youtube is so very important for inventors and scientists of new technologies and free learning. If a company sells a bandwidth they damn sure should not be able to charge more than for internet, just because they want to. Give me a break, hmmm let's see maybe the people could all just set up our own repeaters with transceivers and beowulf clusters, and base our new net on a p2p backbone and make a truly free internet..... if we are pressed who knows..... maybe that would be better but, it would be bad for commerce.

Net Neutrality is essential to free speech, equal opportunity and economic innovation in America. Since the FCC removed this basic protection in 2005, the top executives of phone and cable companies have stated their intention to become the Internet's gatekeepers and to discriminate against Web sites that don't pay their added tolls.

This fundamental change would end the open Internet as we know it. It would damage my ability to connect with others, share information and participate in our 21st century democracy and economy. The FCC must ensure that broadband providers do not block, interfere with or discriminate against any lawful Internet traffic based on its ownership, source or destination.
