

the global free press reality

THE GLOBAL PLANET DESTRUCTION ECONOMY

It is time for the end of Debt and Economic Growth until a global equilibrium is achieved:

To reduce the human quantum impact to what it was some 50 years ago and

hence restore an environmentally sustainable balance between humans and nature

instead of persisting with insane planet destructive growth.

Hence we are calling for 50 years of reductionism instead of growth!

The global debt bubble that feeds on and accelerates itself and multiplies through opaque derivatives regardless of the long-term socio-economic-ecological quantum impact.

It's hardly surprising when the world's largest economy operates out of the planet's most polluting, resource depleted and debt riddled nation.

Perversely all nations aspire to the same objectives so that when the 4000 million humans that today consume less than 20% of resources have caught up:

the planet will be nothing but a polluted, waste riddled, infernal infrastructure desert fit for robots.

The massive, unprecedented global construction madness and mass consumption frenzy that is devouring billions in debt finance has created the planet's biggest natural habitat destruction holocaust as every racketeer has jumped on the bandwagon that is keeping the global economy churning. More than 40% of all global construction and mass consumption is totally superfluous and neither needed nor wanted. The condos, housing estates and apartments are but ever smaller rabbit hutches purchased as "investments". Most of them are smaller than a Victorian kitchen though they cost a lot more. Office towers to house the millions of papershuffling debt administrating clerks have also mushroomed in total defiance of environmental/ecological reality.

The global debt pyramid that has been created by this madness is mind-boggling.

Everything is financed with debt; even profits to sustain the stockmarket overvaluation that sustains

the debt bubble as old debt is simply replaced with more new debt in a massive cycle of underlying global asset inflation that hits the global environment like a cluster of atomic bombs.

Fraudulent sales are booked without any down payment to bolster the crooked accounts.

Auditors are not checking anything but figures; the background of the figures is considered irrelevant!

The punters who buy into these so-called “investments” even finance travel to their “investments” on debt in a gigantic global debt spiral.

All this madness is the result of the crazed Central Bankers and their acolytes who in collusion with the racketeers reduced interest rates to such an extent that so much exponential global debt racketeering was unleashed to produce the politically wanted “economic growth” that keeps the racketeers swimming in paper profits and ignorant central bankers self-congratulating and ordinary people and savers condemned to slavery and poverty.

To compound their complicity the Central Bankers have thrown hundreds of billions at the debt racketeers to sustain the global planet destruction scenario rather than face up to the global environmental reality that debt destroys the planet.

The bankrupt German Economy was turned into the then most powerful war machine under the Nazis and Faschists that nearly destroyed the planet with weapons of mass destruction by simply printing money and debt. They perceived the enemy as anyone opposed to their self-serving ideology; today’s Nazis perceive the enemy as anyone who wants to stop the madness of planet destruction.

“.....I have enormously increased production.....developed traffic.....caused mighty roads to be built.....called into being gigantic new factories.....and at the same time endeavoured to further education and culture...I have succeeded in finding useful work once more for the unemployed....”
Adolf Hitler 28 April 1939. Hitler’s planet destruction ‘achievements’ have since been copied and exceeded by all nations; the environmental fallout becoming ever more irreversible and damaging.

Ironically the two nations that wanted to take over the planet by causing the 2nd world war are today at the forefront of systemic planet destruction under the pretence of “human rights” and “freedom”. It is true there is no official censorship in the “free world”; truth, facts, the socio-economic-environmental reality are simply not reported by the politically correct crony press who will only report what suits their masters to sustain the planet destruction growth ideology that represents the only freedom left.

The debt racketeers set the global economy and its derivatives alight to such an extent that even those on cocaine overdoses (the standard aperitif and after dinner accompaniment of the media, entertainment and financial world who effectively are running the global economy for their own benefit as any international callgirl can confirm) could no longer follow the threads as global “growth” spiralled totally out of control with a massive profit delirium accompaniment. Rather than reign in the madness - growth became a necessity because without growth the bubble might collapse; so that when finally the grotesque over-construction insanity and its accompanying mass-consumption frenzy started to be hit by a sales slowdown whereby debt-laden “investors” would not buy another condo to add to their already bulging “property asset portfolio” because the rental income was non-existent or definitely insufficient to pay the interest on the massive debt mountain: a chain reaction followed that could have been predicted by applying elementary mathematics, logic and foresight.

The madness was compounded by the “buy to let” insanity whereby everybody was supposed to jump on the debt-financed property bandwagon.....

Looking back over the last fifty years it's easy to explain:

global economic growth that has given us climate change, global warming, irreversible habitat/primary forest destruction and bio-diversity extermination, air/soil/water contamination, pollution, finite resource depletion, water shortages, the eclipse of photosynthesis, desertification, overcrowding and over-population and a reality that less than 10% of humans die from old age while the other 90% subsist on a cocktail of drugs, pesticide-laden fastfood

(in Thailand and all over Asia fried cockroaches and other pests are now replacing fresh produce for the poor while the rest of the world is turning into a pigsty where fat-dripping humans resemble the animals they mass-murder and stuff into their bulging bellies),

plastic and endless traffic jams, security checks, infinite Kafkaesque bureaucracy to justify the ever-rising taxes; - in their infinite stupidity bureaucrats, the police and judicial authorities protect the global environmental destruction economy and its perpetrators – so-called environmental laws being specifically designed to sustain “economic growth” -, while the planet is drowning in rubbish, overcrowding and queues –

all this has been “achieved” on debt-financed human population growth that has seen humans triple their planet and self-destructive quantum impact.

Listening to the racketeers and the charlatans who swim in their backwaters on the so-called free press and media such as Bloomberg, on CNBC, on CNN, on BBC World Business Report, in the FT, the Wall Street Journal, reactionary Euronews and all the other financial media you realise that these people have such deep vested interests and/or fear of losing their jobs that they continue to promote “economic growth” as if it was some harmless, necessary financial Viagra that has no side-effects. None of these people including their political acolytes equate “economic growth” with planet destruction because it would of course spoil their profitable VIP rackets – now that there are more billionaires than there were millionaires 50 years ago. And that of course is NOT inflation according to the so-called Central Bankers and their Economist Professors because inflation has been contained for the last 50 years through “economic growth” and debt and derivatives, options and cheap Asian imports etc. What was 50 years ago a 10,000 pound sterling property in London would today be valued in excess of 1,5 million pounds!

According to the political charlatans that too is not inflation.....

Zero interest rates has helped the war beaten Japanese to build an empire that drowns Asia in ever more pollution and traffic jams as the consumption zombies turn debt into hardware when not playing idiotic internet games. The shopping mall religion has turned Asians into self-programmed robots that throng from one mall to the next. Their lives now dominated by commuting from one bunker to another as the Asian landscape is covered in concrete, steel, glass, tarmac, traffic, pollution and rubbish. When the Asian carbon emissions have caught up with Europe and the USA then we need to invent another God to help us all!

The Japanese cannot be blamed because they have simply followed the Christian doctrine of Free Trade that has seen the planet destroyed and billions of humans turned into prisoners whose only freedom is shopping. The Christian nations make fortunes from the global shopping frenzy that is Free Trade by refusing Free Movement of people. If the global Free Trade “economic growth” madness permitted equal Free Movement of People the Christian Free Trade Racketeers would soon get the side effects of their own medicine because “growth” is totally out of control as is its originator: the global debt mountain. The morons and racketeers continue to talk about a sound global economy: how can an economy be sound that destroys the global life support system?

It's time for the end of debt and "economic growth" until a global equilibrium is achieved:

To reduce the human quantum impact to what it was some 50 years ago and

hence restore an environmentally sustainable balance between humans and nature

instead of persisting with insane planet destructive growth.

Hence we are calling for 50 years of reductionism instead of growth!

PS It is an interesting fact that 9 out of 10 email addresses by academic and institutional organisations including universities, the United Nations and the European Union are false or decline to accept our emails, or always reply on autoresponders because they do not want to know the global environmental reality because it conflicts with their vested interests and of course the financial backing they get from the planet destruction racketeers and their cronies aka collusion and corruption.

Yahoo lists now 811 million entries under Environment. Assuming an average of 3 persons per entry that would constitute the entire human world population of 1950 when Pollution, Natural Habitat Destruction, Bio-Diversity Extermination, Acid Rain, Resource Depletion, Ozone Layer Destruction and Climate Change were not on anybody's agenda. It is symptomatic that today's global environmental footprint of the environmental organisations is greater than that of the entire world population in 1950.
