

There is presently no way to know what is going on in this immediate area where we live. A small local radio station, locally owned and operated that is not just part of a huge commercial entity would be helpful.

Please help protect local and diverse radio by adopting the proposal described in MM Docket No. 95-31 to limit the number of applications for the NCE FM New Station Applications in the October 2007 filing window.

By limiting the number of applications from any single entity, the FCC will protect local voices and make sure these new stations serve local communities. The Commission's mandate to foster localism and diversity will be advanced by encouraging wider pool of local applicants.

I strongly urge you to adopt the proposal described in MM Docket No. 95-31 to limit any single entity to 10 applications for the new noncommercial licenses.

Robert Brown
