

The following is my comment to the FCC regarding MM Docket No. 95-31.

Please help protect local and diverse radio by adopting the proposal described in MM Docket No. 95-31 to limit the number of applications for the NCE FM New Station Applications in the October 2007 filing window.

I believe it's of crucial importance to local communities to limit the number of applications from any single entity. The FCC will be protecting local voices and making sure these new stations serve their local communities. Also, the Commission's mandate to foster localism and diversity will be advanced by encouraging wider pool of local applicants.

I strongly urge the FCC to adopt the proposal described in MM Docket No. 95-31 to limit any single entity to 10 applications for the new noncommercial licenses.
