

Congress! Let Freedom Ring on the Internet! Please

I am one of millions of Comcast Cable users. I am not happy with reports that Comcast is banning BitTorrent seeding. I am concerned that this will lead to even more censorship, and higher fees through the concept of Tiered Internet.

I do understand Comcasts publicized statement on the issue; piracy. I feel however that this is a smoke screen for a future 'tiered' internet. This is censorship! If one can pay a slight fee (as has been proposed by some who study this issue) to bypass such tiering, then this becomes Tyranny or extortion.

Thanks for your time and consideration of my argument.
