Re: Docket #07-16

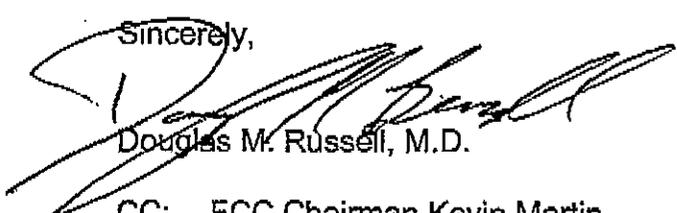

Dear Secretary Dortch,

In America, internet usage is an important part of our businesses, education and communication, yet with all of the technological advances in the United States, we rank just 21st globally in broadband internet access. This leaves our country behind other countries which have broadband internet widely available.

Having more Americans using broadband means more American homes, businesses and schools will be participating and competing in the global economy. I believe the proposal by M2Z Networks to provide free, fast, family-friendly wireless broadband internet access to everyone is step in the right direction and a much needed step as well. With fast, free and reliable internet service, more families and children will be able to use the resources available for learning, shopping and playing so many of us currently enjoy.

Whether internet access is not an option due to cost or rural location, millions of Americans are doing without something they can now have with the help of M2Z Networks. I believe more Americans should be using the Internet, and M2Z's plan allows that to happen. Please approve the proposal by M2Z Networks to provide all Americans with fast, free, family-friendly wireless broadband internet access.

Sincerely,

Douglas M. Russell, M.D.
