Re: Docket #07-16

Dear Secretary Dortch,

Internet access is an important aspect of owning and operating a business. It has become vital for businessmen and women to have access to the many resources and services available online. Unfortunately, many businesses just starting out cannot afford internet access and therefore must sacrifice a resource that is a tremendous benefit for business.

I write to you today to ask for your support of the proposal currently before the FCC to provide fast, free, wireless broadband internet access to all Americans. With over one hundred million Americans not connected to broadband, this plan will have a significant and positive impact on the economy and the businesses that support it.

More successful businesses translate into more successful local economies as well as an improved American economy. America is currently ranked 21st in broadband internet accessibility and I know that we should be at a higher level of competition. I ask you to approve the M2Z Networks proposal to bring fast, free wireless broadband internet access to more Americans. Thank you for your consideration.

Regards,

Ronald Earl Mason
Former State Representative
Former NCGOP Finance Chairman

CC: FCC Chairman Kevin Martin
Commissioner Copps
Commissioner Adelstein
Commissioner Tate
Commissioner McDowell
Fred Campbell, Wireless Bureau Chief
U.S. Senator Elizabeth Dole
U.S. Senator Richard Burr
