Dear Chairman Martin,

America's broadband Internet goals are going unmet and America's international position is rapidly falling. Many American families, schools and libraries cannot afford broadband and most of rural America cannot even get access to the broadband Internet.

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way. I urge you to support the M2Z Networks (www.m2znetworks.com) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It will make us safer. We will become more competitive. It will create equal opportunity. It will improve our great country.

Please support M2Z today. As it is right now, most of NC, with the exception of the largest metropolitan areas have no say in who their provider will be, they have to pay the exorbitant prices, or not have broadband. These prices go up at a rate in double digit figures and we have no say in it. Not only that, every tv is supposed to be digital in the near future, have you had to pay for one digital hookup and one broadband connection--I can tell you, it is in excess of \$125/mo. with NO premium stations only the basics on both the tv and the broadband. This is not fair. We are on a very fixed income and there is nothing we can do about that either. The adage Those who have get more and may God bless those who don't have because no one else will. God gave me a brain but I don't have the money to use it, it costs money to buy supplies and to advertise. Could you live on less than \$1000 a month with a mortgage and all the other expenses. You eventually stop looking at catalogs and magazines so you don't feel so bad and you stay home 99.99% of the time.

Try a life without money, it isn't a life it is merely an existence.

Sincerely,

Leeland Webster
