Commissioner Jonathan Adelstein

Dear Commissioner Adelstein,

The airwaves belong to the public, not corporations like Verizon and AT&T whose anti-competitive practices have resulted in the U.S. falling to 16th in the world in high-speed Internet rankings.

To restore America's leadership in high speed Internet services, the FCC must ensure that the upcoming auction sets aside at least 30 MHz of spectrum for open and non-discriminatory Internet access. This will guarantee that new entrants have the opportunity to enter the market in competition with incumbent providers.

It would be a big mistake to hand over these airwaves to the very same phone and cable companies that dominate the wireline market. We need more competition and innovation, not more of the same. This new wireless spectrum must be open and neutral so that America can build a better Internet for everyone.

Sincerely,
Paulette Cohen

Federal Communications Commission
445 12th Street SW
Washington, DC 20554

Dear Federal Communications Commission,

In keeping with the FCC's mission of protecting the airwaves for the PUBLIC good, I ask you to work with Congress to use the 700MHz spectrum auction to create an open network for consumers. People should be able to use whatever device they want on any network. We should have the freedom to choose among providers. Finally, we should have the freedom to access any content or service we want through these devices.

Effects to exercise corporate control over airwaves is never beneficial to public communication or innovation. Although the iPhone has set the stage for the future of mobile Internet, we can't let companies like AT&T and Verizon have the means to shackle great gadgets to their closed networks.

I believe open access standards should apply to the entire wireless market and I urge you to support this position.

Sincerely,

Dave Sennerud
