Re: *Ex Parte* Communication, PS Docket No. 07-114; CC Docket No. 94-102; WC Docket No. 05-196; WT Docket No. 07-16

Dear Ms. Dortch:

On September 4, 2007, Chris Guttman-McCabe, Vice President, Regulatory Affairs, Brian Josef, Director, Regulatory Affairs, and David Redl, Counsel, Regulatory Affairs, CTIA – The Wireless Association®, met with Erika Olsen, Legal Advisor to Chairman Kevin Martin, concerning issues included in the above-referenced proceedings. As indicated in the attached presentation, CTIA highlighted the significant improvements wireless carriers have made to E911 systems as well as concerns for the inherent difficulties in providing E911 service. CTIA noted that the Commission should not establish a date for effectiveness of any new E911 regulations until all comments have been filed in the proceeding and the Commission, the wireless industry and Public Safety have conferred regarding the numerous technical and implementation issues raised in the Notice of Proposed Rulemaking.

CTIA urged the Commission to implement a forum of technical experts, modeled after the WARN Act's Commercial Mobile Service Alert Advisory Committee, to determine the level of location accuracy compliance possible with current and future technologies, as well as assess other solutions. CTIA, along with a majority of commenters, supports such a forum.

Pursuant to Section 1.1206 of the Commission's Rules, this letter and a presentation made at the meeting are being electronically filed with your office. If you have any questions regarding this submission, please contact the undersigned.

Sincerely,

/s/ Christopher Guttman-McCabe

Christopher Guttman-McCabe
