

Please do not take away Indiana's DO NOT CALL LIST. I live in Indiana and I do not want to receive unsolicited phone calls. Please do not let the Telemarketers sway your decision, please listen to the people. Look at the number of people who have taken the time to register on the list. All of those people are saying NO. The telemarketers can still call those who are not on the list. Why should they be allowed to violate the wishes of those who do not want to be called? Are their rights more important than ours? Really, it is like you have taken a poll and said who would like to be called by Telemarketers? And then, after we did not raise our hand, you would consider voting for us? Not FAIR!
