Robert McDowell
Commissioner, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Robert McDowell:

America's broadband Internet goals are going unmet and America's international position is rapidly falling. Many American families, schools and libraries cannot afford broadband and most of rural America cannot even get access to the broadband Internet.

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way. I urge you to support the M2Z Networks (www.m2znetworks.com) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It will make us safer. We will become more competitive. It will create equal opportunity. It will improve our great country.

Please support M2Z today.

Sincerely,

david speer

Dear Federal Communications Commission,

The iPhone has set the stage for the future of mobile Internet -- but bad policies allow companies like AT&T and Verizon to shackle great gadgets to their closed networks.

To free wireless Internet, the FCC and Congress must use our public spectrum to create an open network that gives consumers:

1. The freedom to use whatever device we want on any network.
2. The freedom to choose among many providers in a competitive wholesale marketplace.
3. The freedom to access any content or services we want through our devices.

These true open access standards should apply to the entire wireless market.

Sincerely,

Victor Avellar

Dear Rebecca,

Millions of Americans' needs are going unmet and America's telecommunications infrastructure is crumbling. Many American families, schools and libraries are being left behind and most of rural America cannot even get a basic broadband Internet.

Communications Commission is concerned about the growing threat to national security posed by the Internet and pornographic material. And private industry and government can't work together due to incompatible interests.

Industry, the FCC and the Commission are asking you to support the M2Z Networks (www.m2z.net) to help get America back on the right track by providing a free, fast, and family-friendly wireless broadband service to make us safer. We will become more competitive and provide a better opportunity. It will improve our great country.

Sincerely,

J. Quillian

Dear [Redacted], I am writing to you regarding the positive impact of the opera and related activities, performers, and countless others both on stage.

It is wonderful to witness the talent and hard work of the performers. The role of the critic is to provide an opportunity for the audience to have their own opinions.

The production team, including the stage designers and lighting technicians, all contribute to the overall quality of the performance. It is a pleasure to see the dedication of everyone involved.

The system of ticketing is designed to be as efficient as possible. It allows the audience to purchase tickets in advance, ensuring a smooth experience for everyone.

I hope you find this information helpful. Please feel free to reach out if you have any questions or need further assistance.

Thank you for your interest in the opera.

Sincerely,
[Redacted]

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way. I urge you to support the M2Z Networks (www.m2znetworks.com) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It will make us safer. We will become more competitive. It will create equal opportunity. It will improve our great country.

Spectrum is a public resource. The FCC works for the people and should listen to us and what we have to say. Please support M2Z today.

Sincerely,

Karen Powell

Dear Robert McDowell:

America's broadband Internet goals are going unmet and America's international position is rapidly falling. Many American families, schools and libraries cannot afford broadband and most of rural America cannot even get access to the broadband Internet.

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way.
