Deborah Taylor Tate
Commissioner, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Deborah Taylor Tate:

As you have traveled around Nebraska's 3rd District, surely you've noted how important internet access...the affordable sort most people need...will be to all who live out here. Please seriously consider this plan for free internet access for all.

America's broadband Internet goals are going unmet and America's international position is rapidly falling. Many American families, schools and libraries cannot afford broadband and most of rural America cannot even get access to the broadband Internet.

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way. I urge you to support the M2Z Networks (www.m2znetworks.com) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It will make us safer. We will become more competitive. It will create equal opportunity. It will improve our great country.

Please support M2Z today.

Sincerely,

Gayle & Robert Behm

Chicago, IL 60624-2231

August 16, 2007

Jonathan S Adelstein
Commissioner, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Jonathan Adelstein:

The Internet has become an integral part of American life and will only become more important in the future. That is why all Americans, especially American school children, need access to Internet service that's free, fast, and family-friendly - at school and in the home.

Unfortunately, current prices for broadband in the United States are among the highest in the world. No American child should be left behind because existing broadband options are not affordable.

Furthermore, parents and teachers are currently saddled with the burden of trying to protect children from indecent material on the Internet. Network level filtration of indecent content is the best solution available to ensure that children cannot access explicit Web sites, allowing parents and teachers more freedom to utilize the educational resources available online.

Implementation of a proposal now pending with the FCC, such as the one submitted by M2Z Networks (www.m2znetworks.com) to provide a universal, free, fast, and family-friendly broadband service, is supported by the Coalition for Free Broadband Now and is a necessary step to both ensuring that American school children, parents and teachers have affordable broadband access and to protecting our children online. I urge you to act on such proposals today!

Sincerely,

Marlone Finley

Robert McDowell
Commissioner, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Robert McDowell:

America's broadband Internet goals are going unmet and America's international position is rapidly falling. Many American families, schools and libraries cannot afford broadband and most of rural America cannot even get access to the broadband Internet.

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way. I urge you to support the M2Z Networks (www.m2znetworks.com) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It will make us safer. We will become more competitive. It will create equal opportunity. It will improve our great country.

Please support M2Z today.

Sincerely,

Vincent J. Julian, Jr.
