Kevin J Martin
Chair, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Kevin Martin:

America's broadband Internet goals are going unmet and America's international position is rapidly falling. Many American families, schools and libraries cannot afford broadband and most of rural America cannot even get access to the broadband Internet.

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way. I urge you to support the M2Z Networks (www.m2znetworks.com) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It will make us safer. We will become more competitive. It will create equal opportunity. It will improve our great country.

Please support M2Z today.

Sincerely,

robert hester

Jonathan S Adelstein
Commissioner, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Jonathan Adelstein:

America's broadband Internet goals are going unmet and America's international position is rapidly falling. Many American families, schools and libraries cannot afford broadband and most of rural America cannot even get access to the broadband Internet.

Once online, many families are concerned about the growing threat to children of easily accessible indecent and pornographic material. And public safety organizations often can't work together due to incompatible data networks.

It doesn't have to be this way. I urge you to support the M2Z Networks (www.m2znetworks.com) plan to put America back on the right track by providing 95% of America with access to a free, fast, and family-friendly wireless broadband Internet. It will make us safer. We will become more competitive. It will create equal opportunity. It will improve our great country.

Please support M2Z today.

Sincerely,

Mark Welch

Robert McDowell
Commissioner, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Robert McDowell:

The principal reasons why I support free internet service to all who want it in the U. S. are these: 1) equal access to communications is essential to the preservation of our democracy, 2) the internet was created and developed as a part of "the commons" -- to give all Americans the ability to obtain information and share knowledge. Knowledge IS power and should not be controlled by corporations. Rule by corporations or control of our government by corporations is FASCISM. We need to stop the rise of fascism (corporately controlled government) immediately. We MUST preserve the internet and make it equally available to all citizens. Protect the commons.

Please support M2Z today.

Sincerely,

Rebecca Wolfe

Robert McDowell
Commissioner, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Robert McDowell:

I know you were elected/appointed to maximize profits but could you - just this once, I won't ask again - think about the users of services? AT&T, Verizon, and others who have contibuted to the cause have already received their reward; they helped a patriotic misson to ferret out evil-doers searching for porn.

Thanks for not listening although I know you want to. It's tough to run the world when the people you "represent" do not want the same things as you. I hope your family is well.

Sincerely,

David Rizzi
