

Hi i am jose and i think is a good idea to establish a LPAM Radio service (10 To 25 watts). Because the big radio stations only thinks in the money and dont think in the people problems they sell the local radio stations to the big networks and we loss the local radio stations, i want to have this LPAM radio service and i think 10 to 25 watts is good. thanks to give me this oportunity to lets tell you my opinion.
