

I received a MMSI number from BoatUS about two years ago. That is a GREAT program. I will be travelling to international waters next year and hoped to be able to use my current MMSI number and radio. Please make sure that MMSI numbers issued by BoatUS can be accepted by the FCC database to allow me to use the radio internationally. Getting a new number from the FCC will require a new radio. That is an unreasonable expense to solve a Information Technology problem that can be fixed. Thank you. Curt Wozniak
