

Due to a glitch in the Federal Communications Commission (FCC) licensing system, my MMSI issued by BoatUS will be seen as "invalid" when I choose later to obtain an FCC radio license. BoatUS is trying to fix this problem. In response to a recent FCC Public Notice, I am writing to ask you to fix your system so boaters can avoid this unneeded inconvenience and cost. Thanks for your consideration to this matter.

Respectfully,

George Ruelens
