

Comcast is Killing ME!

Net Neutrality is essential to free speech, equal opportunity and economic innovation in America. Since the FCC removed this basic protection in 2005, the top executives of phone and cable companies have stated their intention to become the Internet's gatekeepers and to discriminate against Web sites that don't pay their added tolls.

This fundamental change would end the open Internet as we know it. It would damage my ability to connect with others, share information and participate in our 21st century democracy and economy. The FCC must ensure that broadband providers do not block, interfere with or discriminate against any lawful Internet traffic based on its ownership, source or destination.

We as a country have given away most of our rights to businesses who say they have the best interest of our country and economy in mind. We have lost so much productivity here in manufacturing, education, and health care because there was an added revenue stream that can be tapped by these businesses. I plead with you not to let the internet become another tragic mistake or politics and/or greed and corruption. Be the honest citizens in charge of regulating these companies in the service of the populace of the United States!

I beg of you have a backbone and don't take the money from them it will hurt us!
