Commissioner Robert McDowell

Dear Commissioner McDowell,

The airwaves belong to the public, not corporations like Verizon and AT&T whose anti-competitive practices have resulted in the U.S. falling to 16th in the world in high-speed Internet rankings.

To restore America's leadership in high speed Internet services, the FCC must ensure that the upcoming auction sets aside at least 30 MHz of spectrum for open and non-discriminatory Internet access. This will guarantee that new entrants have the opportunity to enter the market in competition with incumbent providers.

It would be a big mistake to hand over these airwaves to the very same phone and cable companies that dominate the wireline market. We need more competition and innovation, not more of the same. This new wireless spectrum must be open and neutral so that America can build a better Internet for everyone.

Sincerely,
Frank Minero

I do not know what my iPhone complaint has to do with open access issues and the 700 MHz auction.

The iPhone revolutionizes cell phones and the FCC is allowing AT&T to have a monopoly on access to the iPhone. I do not have AT&T for my cell phone service but want an iPhone.

It is my expectaion that the FCC will put an end to the Apple AT&T monopoly and force Apple to make the iPhone available to all cell phone companies. When will the FCC accomplish this simple task?

Thank you

Rich Young
