

Pocket Communications
HAC – Status Report
WT Docket No. 01-309
November 20, 2007

This report demonstrates Youghioghenny Communications dba Pocket Communications' efforts to comply with HAC (Hearing Aid Compatibility) requirements in Pocket's Network in San Antonio and Laredo. This report is intended to show our efforts to comply with the HAC requirements of section 20.19 of the FCC's rules. Pocket Communications is a small Tier III CDMA carrier and covers the San Antonio and Laredo areas of Texas.

Pocket Communications supports the HAC requirements. We have made every effort to make handsets available to our customers that support the HAC rules. Being a Tier III carrier, however, we have very limited purchasing power and rely on many third party distributors to provide us handsets for sale. We do not have direct purchasing from any of the handset manufacturers. As such, we rely on all distributors and handset manufactures to test for all aspects of HAC.

Of the total 14 handset models we offer to customers, we carry the following HAC-compliant handsets for sale in our Direct (Pocket owned and operated) stores:

Model	Rating
Kyocera K342	M3
Motorola 323	M4/T4
Motorola V3m RAZR	M4/T4
Motorola L7 SLVR	M4/T4
Motorola k1Krzz	M3/T4

As a very small Tier III carrier, Pocket relies on our distributors and the manufacturers of the handsets themselves for all aspects of testing and product development of handsets and accessories, as well as interoperability testing and standards development. We also rely on our distributors for all packaging of all handsets and accessories that we sell in our stores, and have taken reasonable efforts in light of our indirect relationship with manufacturers to ensure that handsets are appropriately labeled and packaged. Pocket also supports and relies on wireless industry organizations such as Rural Cellular Association, of which Pocket is a member, to support any efforts with the disabled community.

Please contact the undersigned if there are questions regarding this report.

Sincerely,

Youghioghny Communications dba Pocket Communications
