

I oppose the revisions to the Newspaper/Broadcast Cross-Ownership Rule. Diversity of information is always in the public interest and is a basic protection of our free and democratic way of life. To make any changes to the rules that will essentially limit diversity of information to the public to even a limited degree is an endangerment to our liberties. I believe that the public has already made it clear that they do not want these changes for the reasons just stated. Maybe Mr. Martin needs to go back to civics class so that he can understand what the public is trying to tell him.
