

I am a homeowner in The Hammocks, a sub-division of Live Oak in New Tampa, FL.

I am forced to pay a premium for Cable, Internet and Security Monitoring through Century Communications because of Bulk Billing in my neighborhood. As it stands I am paying for internet service I do not use at this time because I went with a better carrier. I would also change my phone and cable service because I don't believe they provide a great service, but I do not want to be paying even more for services that I already have.

This has always been a complaint of mine since I have lived in the Hammocks. I have been paying way too much for sub-standard service because there is no other choice unless this ruling includes Century Communications.
