

**Before the
FEDERAL COMMUNICATIONS COMMISSION
Washington, DC 20554**

In the Matter of

BendBroadband's Request for Waiver
of 47 C.F.R. § 76.1204(a)(1)

CSR-7057-Z

SWORN DECLARATION OF AMY C. TYKESON

1. My name is Amy C. Tykeson. I am the President and CEO of Bend Cable Communications, LLC d/b/a BendBroadband ("BendBroadband"). I declare under penalty of perjury that the facts contained in this Declaration are true and correct to the best of my knowledge, information, and belief, and that I am authorized to give this Declaration on behalf of BendBroadband. This declaration supersedes my declaration filed by BendBroadband in this proceeding dated June 30, 2007.

2. BendBroadband has initiated a transition of its cable system used to serve residential customers in its franchise areas in central Oregon to an all-digital network with the expectation of completing the transition by February 17, 2009, contingent on the continued commercial availability of DCT-700 set-top boxes.

3. On or about June 1, 2007, BendBroadband ceased its offering of analog basic cable to new customers and to existing customers that are transferring services to a new address. These customers may choose from four of BendBroadband's all-digital service packages, such as its digital limited basic, digital family basic, digital essentials basic and digital preferred basic. For its existing analog customers, BendBroadband is offering special promotions and free self-installation options to encourage them to switch voluntarily to all-digital service prior to BendBroadband's termination of analog services. As of the date of this affidavit, more than three-quarters of BendBroadband's cable customers now subscribe to digital service.

4. BendBroadband has notified and continues to notify all of its remaining analog video customers of its plans to go all-digital on or before December 31, 2008. In addition, BendBroadband's transition has been highlighted in Bend's largest newspaper, on BendBroadband's website and through commercial advertisements on the cable system. As explained in my June 30 declaration, BendBroadband may continue to provide analog service until February 17, 2009 as a grace period beyond its announced December 31, 2008 transition date.

5. BendBroadband has placed orders for enough set-top boxes, in combination with its existing inventory, to ensure that each of its customers can continue to view BendBroadband's video programming on their television sets.
