FAIRPOINT PROPOSING TO INVEST AN INITIAL \$13.6 MILLION IN BROADBAND EXPANSION IN NEW HAMPSHIRE UPON MERGER COMPLETION

CONCORD, NH (July 24, 2007) – FairPoint Communications, Inc. (NYSE:FRP) (the “Company” or “FairPoint”) today announced its intention to invest \$13.6 million in expansion of broadband service upon completion of its proposed acquisition of the New Hampshire landline business from Verizon Communications Inc. (“Verizon”). This expansion is expected to bring broadband service to 19 New Hampshire communities for the first time, and extend high-speed DSL Internet to currently unserved neighborhoods in approximately 55 New Hampshire communities.

“FairPoint is committed to bringing increased broadband accessibility to the citizens of New Hampshire,” said Walter E. Leach, Jr., FairPoint’s executive vice president. “Today’s announcement is a clear indication of how seriously we take this commitment. In addition to enabling many residents of New Hampshire to benefit from high-speed Internet for the first time, we believe that this new broadband availability will provide a significant boost to the New Hampshire economy, giving many New Hampshire businesses the ability to compete more effectively.”

Leach said the Company’s near-term goal is to extend high-speed Internet capability to approximately 108,000 additional access lines in New Hampshire following the proposed acquisition. FairPoint expects to provide broadband capability to 80 percent of its New Hampshire customers by the first quarter of 2010.

“We are approaching 100 percent broadband accessibility in our existing FairPoint markets. We intend to continue expanding broadband in the current Verizon service areas in New Hampshire in an effort to reach the same high level of service,” Leach said.

“FairPoint will be installing an advanced, next generation network, capable of supporting existing subscriber needs and also providing a platform for the future,” Leach said.

Responding to FairPoint’s announcement, Mr. George Bald, Commissioner of New Hampshire’s Department of Resources & Economic Development stated, “Broadband accessibility is key to a region’s ability to compete and succeed both nationally and globally. To that end, we are excited by efforts and initiatives that extend the reach of high speed internet service to rural areas which have traditionally not had access to the same level of technology as their urban neighbors.”

The network FairPoint is proposing is designed for today’s data hungry customers. The Internet uses Internet Protocol (IP) to move traffic across the network. FairPoint’s network design will use this protocol throughout the network, instead of using multiple protocol changes necessary to use the existing voice network to build a much more efficient network. FairPoint intends to capitalize on the existing fiber cable in which Verizon has invested by installing new electronics equipment on it. This new electronics equipment supports several ways of reaching the customer including copper technologies such as

ADSL2+, VDSL2 and Fiber to the Home technologies such as GPON and Active Ethernet. The Company has successfully rolled out the DSL Ethernet based network in several of its other markets.

FairPoint's plan calls for the completion of the installation of high speed DSL in the following New Hampshire communities for the first time by the end of 2008: Bartlett, Center Sandwich, Errol, Fitzwilliam, Jefferson, Lisbon, Lyme, Marlow, Milan, North Haverhill, North Stratford, Pike, Pittsburg, Rindge, Rumney, Twin Mountain, Warren, West Stewartstown and Woodsville.

Approximately 55 New Hampshire communities served by Verizon have broadband service in some neighborhoods, but not others. FairPoint intends to extend broadband to unserved neighborhoods in the following communities by the first quarter of 2010: Ashland, Atkinson, Bedford, Berlin, Bristol, Canterbury, Center Harbor, Center Ossipee, Concord, Derry, Dover, Enfield, Epping, Epsom, Exeter, Farmington, Franklin, Glendale, Hampton, Hanover, Harrisville, Hinsdale, Keene, Kingston, Laconia, Littleton, Manchester, Merrimack, Milford, Milton, North Conway, Nashua and Newmarket.

Also included are: Newport, Northwood, North Woodstock, Pelham, Peterborough, Plaistow, Plymouth, Portsmouth, Raymond, Rochester, Rye Beach, Seabrook, Salem, Sanbornville, Somersworth, Spofford, Sunapee, Tamworth, Tilton, Walpole, Westmoreland and Wolfeboro.

"This new access to high-speed Internet will allow residents and businesses in these communities to communicate much more quickly. Businesses will be able to compete more effectively and this broadband service will enable them to provide their services to anyone anywhere in the world," said Leach. "Additionally, this new access will provide increased opportunity for New Hampshire's students, helping to allow them to better compete in the world of tomorrow."

FairPoint had previously announced that it expected to spend an initial total of approximately \$44 million in Maine, Vermont and New Hampshire combined. The \$13.6 million investment in New Hampshire is part of the previously announced total of \$44 million.

About FairPoint

FairPoint is a leading provider of communications services to rural and small urban communities across the country. Incorporated in 1991, FairPoint's mission is to acquire and operate telecommunications companies that set the standard of excellence for the delivery of service to rural and small urban communities. Today, FairPoint owns and operates 31 local exchange companies located in 18 states offering an array of services, including local and long distance voice, data, Internet and broadband offerings. The Company is traded on the New York Stock Exchange under the symbol "FRP".
