Dear Federal Communications Commission,

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections.

The FCC must take immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example and discriminating against the free flow of online information.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Sincerely,

Rebecca Schwarz

DEC 14 2007

Federal Communications Commission  
Office of the Secretary

Federal Communications Commission  
445 12th Street SW  
Washington, DC 20554

Dear Federal Communications Commission,

To whom it may concern...

I was recently made aware of Comcast's recent attempt to violate the principle known as "Net Neutrality". I'm sure you at the FCC are well aware of this concept, and why maintaining Net Neutrality is vital for the health of thousands of small businesses across America.

Comcast's blocking of peer-to-peer communications is exactly the problem millions of Americans have warned you would occur without Net Neutrality protections.

As a concerned citizen, I humbly ask that the FCC must take immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example and discriminating against the free flow of online information.

The Internet is a vital engine for economic growth, participation in our civic duties, and free speech. It's one of the greatest tools available to Americans, and we can't make the same mistake China, Iran, and North Korea have by limiting access to our citizens. We should not allow independent gatekeepers to silence these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic or stifling innovation.

I realize Comcast is a business too, and they need to make a profit as well. However, making money off from blocking Net Neutrality is simply a bad idea, and ultimately counter-productive.

Thank you for your time.

Sincerely,

Brad Wasbrough

Dear Federal Communications Commission,

I know that the FCC board members are appointed by the President, and I have little faith in the current President's appointees, but this is ridiculous. I was at USC when the FCC was getting public feedback about relaxing conglomerate rules and one thing was abundantly clear: the "people" who wanted big changes like this were not the American public, they were wealthy corporations who have made large campaign contributions. This is NOT a good way to run a system of government; as such it's a bit of a farce to call this a democracy.

Net Neutrality is the latest chapter in the money grubbing book. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections.

The FCC must take immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example and discriminating against the free flow of online information.

Dear Federal Communications Commission,

Comcast's deception in choosing to block peer-to-peer communications is the sort of problem that millions of Americans were worried would occur without Net Neutrality protections.

I write to encourage the FCC to take immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example and discriminating against the free flow of online information.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Dear Federal Communications Commission,

As a retired engineer with over 25 years working in the telecommunications industry, I must protest Comcast's heavy handed and deceptive actions in blocking ("delaying" in their self-serving statements) specific types of communications by their customers and others.

Comcast's additional lying about their actions, repeatedly, in saying that they do not interfere with specific types or methods of communication, indicates to me that they need a hit in their pocketbooks to get their attention, and ongoing guidance and examination of their methods.

The FCC promised that it would take action should this sort of action by the carriers take place. Now that this class of action by at least one of the carriers has been proved by several independent sources, the time for STRONG action by the FCC has come.

You are our protection. Please protect the public.

Sincerely,

Tom Losh

Dear Federal Communications Commission,

I recently found out that Comcast is blocking some online communications among users. This is very scary. Companies should not be allowed to control the public's communications like that. America is founded on the free expression of ideas.

The FCC needs to stop this and take action to protect net neutrality.

Sincerely,

William McMullin
