Ms. Cathy Pircsuk  
General Manager  
Station WWNY-DT  
120 Arcade Street  
Watertown, New York 13601

**Re: WWNY-DT, Carthage, New York**

Dear Ms. Pircsuk:

This is with reference to the proposal of station WWNY-DT to operate post-transition with an omnidirectional, top-mounted antenna on VHF Channel 7, as described in the engineering material your counsel has provided to us and as proposed to the FCC in comments that United Communications Corporation, licensee of WWNY-DT, filed in response to the FCC's Further Notice of Proposed Rulemaking in Docket 07-91.

The purpose of this letter is to confirm the consent of EBC Buffalo, Inc., the licensee of WNGS, to the UCC proposal. Based on your engineering study, we are informed that this change would result in an increase in interference to approximately 0.3% to the projected coverage area of the facility requested in the proposal of our station WNGS, Springville, New York, to change transmitter sites and to change the station's permanent digital allotment to Channel 7. The two transmitter sites are separated by a distance of some 170 miles.

Naturally, EBC reserves the right to object to any change in the DTV facilities that may be proposed for WWNY-DT in the future that would increase predicted interference to WNGS beyond the levels to be caused by the operation described above.

Yours truly,

Lori E. Withrow  
Corporate Secretary  
EBC Buffalo, Inc.
