

I oppose eliminating digital RF modes in the HF radio spectrum. I do not see a risk to this spectrum as the HF bands are less crowded than they were 25 years ago with declining number of hams.

Suggest, rewriting this petition to band limit or segregate NOT abolish automatic digital modes in the HF spectrum.

Sailors depend on Winlink and the innovations in PACTOR II & III and are often the only form of communication out at sea. This encourages sailors to become hams.

I OPPOSE THIS PETITION AND STRONGLY SUGGEST NOT CHANGING THE BANDS.
