DOCKET FILE COPY ORIGINAL
Federal Communications Commission
Office of the Secretary

Dear Federal Communications Commission,

The iPhone has set the stage for the future of mobile Internet -- but bad policies allow companies like AT&T and Verizon to shackle great gadgets to their closed networks.

To free wireless Internet, the FCC and Congress must use our public spectrum to create an open network that gives consumers:

1. The freedom to use whatever device we want on any network.
2. The freedom to choose among many providers in a competitive wholesale marketplace.
3. The freedom to access any content or services we want through our devices.

These true open access standards should apply to the entire wireless market.

Sincerely,

Cindy Idler
1205 N.E. 63rd Ave.
Portland, OR 97213

Dear Commissioner Adelstein,

Please stop AT&T, Verizon, etc. from ruining our Internet, keep Net Neutrality for our Internet, and expand this rule to our mobile phones.

Please do not auction a slice of the spectrum, as it is an opportunity to save room for universal broadband access. These companies will hoard this valuable spectrum and stifle competition. We know that competition will lower costs to the consumers.

The airwaves belong to the people and these sales, with flawed auction rules, are not in the public interest.

>> The FCC is going to auction off the 700 mhz radio spectrum for WiFi and other over the air communications. Only so much of it available or is there?

>>

>> I was thinking about an idea where FCC could open up new frequency slots

>> and have almost unlimited frequencies for using, to communicate over the

>> air. It involves phase shifting the modulating signal used to excite the carrier frequency and redesigning the receiver, using a narrow band pass filter. If you take a carrier; say at 710 mhz an phase shifted its modulating signal 90 degrees, then any data transmitted at that frequency, shouldn't interfere with a receiver set up to receive a signal at 710 mhz, with no phase shift. So, if we can transmit four signals at 710 mzh, phase shifted 90 degrees, depending upon how sharp a received band pass filter, the receiver has you could transmit almost unlimited data, separated by 'n' degrees. Da.

Commissioner Jonathan Adelstein

Dear Commissioner Adelstein,

The airwaves belong to the public, not corporations like Verizon and AT&T whose anti-competitive practices have resulted in the U.S. falling to 16th in the world in high-speed Internet rankings.

To restore America's leadership in high speed Internet services, the FCC must ensure that the upcoming auction sets aside at least 30 MHz of spectrum for open and non-discriminatory Internet access. This will guarantee that new entrants have the opportunity to enter the market in competition with incumbent providers.

It would be a big mistake to hand over these airwaves to the very same phone and cable companies that dominate the wireline market. We need more competition and innovation, not more of the same. This new wireless spectrum must be open and neutral so that America can build a better Internet for everyone.

I write this in confidence that you, as public commissioners, value the good of your communities more than the advancement of certain large organizations.

Thank you for your time and for being the ones to make such large-scale decisions. I applaud you for taking on this significant responsibility with such long-lasting effects.

rob@takes.us wrote on 9/27/2007 1:02:19 PM :

Mr. Martin,

When the initial announcement was made about the 700mhz spectrum auction, I applauded the consumer orbit in which the provisions were traveling. Open-access is the right thing to do and puts the consumer in control by making companies compete.

I said to myself, "For once, the FCC is looking out for the consumer rather than the companies for which they hope to work after they are done with the FCC."

Although now I read that you are fast-tracking a claim by Verizon that this is unconstitutional. It's interesting how quickly you turn heel.

Spectrum is inherently a public interest because it is finite. Your fealty to big business at the expense of the public interest is transparent, abhorrent, and more than disappointing.

I long for a day when men and women look at the FCC as a means to champion the public interest, as a calling above a later job obtained through favors given while in office. You are breaking our system of government.

Sincerely,
Rob Boles

I request that you permit M2Z to have the 700MHz spectrum to deliver free broadband internet to every American.
Thank you,

Gary Cleveland

Dear Federal Communications Commission,

The iPhone has set the stage for the future of mobile Internet -- but bad policies allow companies like AT&T and Verizon to shackle great gadgets to their closed networks.

To free wireless Internet, the FCC and Congress must use our public spectrum to create an open network that gives consumers:

1. The freedom to use whatever device we want on any network.
2. The freedom to choose among many providers in a competitive wholesale marketplace.
3. The freedom to access any content or services we want through our devices.

These true open access standards should apply to the entire wireless market.

Sincerely,

C.J. Fryer
5153 Winters Lane
Cold Spring, KY 41076
