

I listen to 1560 The Touch every day! It's the only station that I'm aware of in this area that caters to the needs and concerns of the African American community in a positive light. For example: Saturday's gospel program, r&b music, health issues, infant mortality etc. Because the station goes off so early now, everyone isn't afforded the opportunity to listen to the music and sometimes life changing programs/educational advertisements. I hope it's switched to FM.
