

Radio Maria, Inc., ("RMI") is the non-commercial Licensee of Radio Station KNIR (AM), New Iberia, Louisiana which provides Catholic programming to rural Louisiana. RMI operates KNIR (AM) at 1kW daytime and 209 watts at night on a frequency of 1360 kHz. Because of the multiple interference sources, RMI's signal at night is very poor. Having the ability to broadcast in the FM band would have a significant positive impact on RMI and its listeners. Under the circumstances, RMI fully supports the use of FM translators to rebroadcast AM Stations.
