Low power nighttime coverage

WE DESPERATELY NEED HELP SERVING OUR COMMUNITY AND LISTENERS

We have a terrible time trying to serve our dedicated listeners who depend on us for severe weather announcements during blizzards or tornados. This becomes a life threatening issue. Our listener ship deserves better. On a less life-threatening note, we program church services where listeners within our own community are unable to get a clear signal. High school sporting events require listeners to endure high amounts of static or no signal at all. For us to be able to compete commercially with internet streaming, satellite radio and all other competitors, we desperately need help to be able to serve our listener-ship with a reasonable signal within our normal coverage area. FM translators will help solve some of these problems. We strongly support this effort as AM signal coverage continues to be encroached upon by interference.

I SUPPORT THE USE OF FM TRANSLATORS TO SOLVE THIS PROBLEM
